Abstract	I
Acknowledgements	iii
Contents	v
List of Figures	ix
List of Tables	xiii
List of Symbols	xv
List of Abbreviations	xvii

Chapter 1: INTRODUCTION

1.1	Importance of Hydrogen Gas Sensor	1
1.2	Gas Sensor	2
	1.2.1 Classification of Gas Sensor	2
	1.2.1.1 Optical Gas Sensor	3
	1.2.1.2 Gas Chromatograph	3
	1.2.1.3 Calorimetric Gas Sensor	3
	1.2.1.4 Acoustic Method based Gas Sensor	4
	1.2.1.5 Polymers based Gas Sensor	4
	1.2.1.6 Carbon Nanotube based Gas Sensor	4
	1.2.1.7 Semiconductor Metal Oxide based Gas Sensors	4
	1.2.2 Comparison of Gas Sensors	5
	1.2.3 Characteristics of Gas Sensor	6
	1.2.3.1 Sensor Response/Selectivity	6
	1.2.3.2 Response and Recovery Time	6
	1.2.3.3 Selectivity and Limit of Detection	6
	1.2.3.4 Operating Temperature	6
1.3	Gas Sensing Mechanism	7
1.4	Enhancement Factor of Sensitivity	9
	1.4.1 1-D Nanostructured based Gas Sensors	9
	1.4.2 Schottky Contacted Nanostructured based Gas Sensors	10
	1.4.2.1 Metal-Semiconductor Contacts	10
	1.4.2.2 Schottky Contacted Gas Sensing Enhancement	11
	1.4.3 Post Deposition Techniques (Swift Heavy Ion and Gamma Irradiation)	12
1.5	Literature View	13
	1.5.1 ZnO Nanostructure based Hydrogen Sensor	13
	1.5.2 Schottky Contacted ZnO Nanostructure based Hydrogen Sensor	14
1.6	Motivation	16
1.7	Research Objective	16
1.8	Organization of Thesis	17

Chapter 2: Fabrication and Characterization Techniques

2.1	Introduction	19
2.2	Deposition Techniques	19
	2.2.1 RF Sputtering	19
	2.2.2 Thermal Evaporation	21
2.3	Irradiation Techniques	22
	2.3.1 Gamma Irradiation	23
	2.3.2 Swift Heavy Ion Irradiation (SHI) Technique	23
2.4	Characterization Techniques	24
	2.4.1 X-Ray Diffraction (XRD)	24

2.4.2	Atomic Force Microscopy (AFM)	25
2.4.3	Field Emission Scanning Electron Microscopy (FESEM)	27
2.4.4	Cathodoluminescence Spectroscopy (CL Spectroscopy)	28
2.4.5	Photoluminescence Spectroscopy (PL Spectroscopy)	29
2.4.6	Raman Spectroscopy	29
2.4.7	Electrical Characterization (I-V Characterization)	30
2.5	Gas Sensing Characterization	31

Chapter 3: Deposition of ZnO Thin Films

3.1	Introduction	33
3.2	Growth Mechanism of Thin Films	33
3.3	Effects of Deposition Parameters on ZnO Thin Films	35
3.3.1	Substrate Temperature Dependence	35
3.3.1.1	Experimental Setup	35
3.3.1.2	Structural Characterization	36
3.3.1.3	Stress Analysis	37
3.3.1.4	Surface Morphology	40
3.3.1.5	Optical Characterization	42
3.3.2	Ar/O ₂ Gas Ratio Dependence	42
3.3.2.1	Experimental Setup	42
3.3.2.2	Structural Characterization and Stress Analysis	43
3.3.2.3	Surface Morphology	45
3.4	Conclusion	47

Chapter 4: Deposition of ZnO Nanorods

4.1	Introduction	49
4.2	Growth Mechanism of ZnO Nanostructures	50
4.2.1	Vapour-Liquid-Solid (VLS) Growth	50
4.2.2	Vapour-Solid (VS) Growth	51
4.3	Effects of Sputtering Deposition Parameters	52
4.3.1	Substrate Temperature Dependency	52
4.3.1.1	Experimental Setup	52
4.3.1.2	Structural Characterization	52
4.3.1.3	Surface Morphology	53
4.3.1.4	Optical Characterization	55
4.3.2	Substrate Dependency	55
4.3.2.1	Experimental Setup	55
4.3.2.2	Structural Characterization	56
4.3.2.3	Surface Morphology	57
4.4	Conclusion	58

Chapter 5: Study of Temperature Dependent Electrical Transport and Low Temperature H₂ Gas Sensors based on ZnO NRs/Si HJ

5.1	Temperature Dependent Electrical Transport Studies of Self-Aligned ZnO NRs/Si Heterojunction (HJ)	61
5.1.1	Deposition of ZnO NRs and Device Fabrication	62
5.1.2	Structural, Surface Morphology and Optical Characterization of ZnO NRs	62
5.1.3	Temperature Dependent Current-Voltage (I-V-T) Characteristics	64
5.1.4	Effect of Barrier Inhomogeneities (BH) on Effective Barrier Height, Ideality Factor and Richardson Constant	68
5.2	ZnO Nanorods for Low Temperature Hydrogen Sensor Applications	72
5.2.1	ZnO NRs based Hydrogen Sensor Fabrication	72
5.2.2	Structural, Surface Morphology and Optical Characterization of ZnO NRs	73
5.2.3	Current Density with Voltage (J-V) Characterization of ZnO NRs/Si Junction	75
5.2.4	Ohmic Contacted ZnO NRs/Si/ZnO NRs DHJ based Hydrogen Sensor	77

5.3	5.2.5 Proposed Hydrogen Gas Sensing Mechanism	79
	Conclusion	80
Chapter 6: Schottky-Contacted Vertically Self-Aligned ZnO Nanorods for Hydrogen Gas Nano-Sensor		
6.1	Introduction	83
6.2	Experimental Setup	83
6.3	Characterization of ZnO NRs	84
6.4	Schottky Contacted Au/ZnO NRs based Sensor for Hydrogen Sensing	86
6.5	Proposed Gas Sensing Mechanism	91
6.6	Schottky Contacted Pd/ZnO NRs based Nanosensors	92
6.7	High Selectivity of Pd/ZnO NRs based Hydrogen Sensors	94
6.8	Conclusion	96
Chapter 7: Effect of Gamma Irradiation on Vertically Aligned ZnO Nanorods based Hydrogen Sensor		
7.1	Introduction	99
7.2	Experimental Setup	100
7.3	Effects of Gamma Irradiation on Surface Morphology	100
7.4	Effects of Gamma Irradiation on Structural Properties	102
7.5	Effects of Gamma Irradiation on Optical Properties	102
7.6	Effects of Gamma Irradiation on Hydrogen Gas Sensing Properties	103
7.7	Proposed Gas Sensing Mechanism	105
7.8	Conclusion	106
Chapter 8: Improvement in Sensing Response of Nano-Crystalline ZnO based Hydrogen Sensor: Effect of Swift Heavy Ion Irradiation		
8.1	Introduction	109
8.2	Experimental Setup	110
8.3	Structural Properties of Nano-Structure ZnO Thin Films	111
8.4	Stress Analysis	112
8.5	Optical Properties of Nano-Structure ZnO Thin Films	113
8.6	Effect of SHI on Surface Morphology	114
8.7	Effect of SHI on Hydrogen Gas Nano-Sensor	116
8.8	Conclusion	119
Chapter 9: Conclusion and Future Work		121
Publications		123
References		124
