Abstract	vii
Publications	ix
Acknowledgment	xi
1 Introduction	1
1.1 Non-Hermitian quantum systems	1
1.2 Real-Spectrum of Non-Hermitian systems: Unveiling fascinating physics	2
1.3 Non-Hermitian physics and $\mathcal{PT}$ -symmetry: Impact in optics and photonics	3
1.4 Singularities in non-Hermitian systems	6
1.4.1 Behaviour of level-repulsions and associated singularities	6
1.4.2 What are the exceptional points of different order?	8
1.5 Different order of exceptional points in optics and photonics: Brief review	10
1.5.1 EPs in waveguides and coupled microcavities	13
1.5.2 EPs in photonic lattices and crystals	14
1.5.3 Utilization of EPs towards lasing application	15
1.5.4 Applications of EPs towards lasing and coherent-prefect absorption	16
1.5.5 Applications of EPs:asymmetric backscattering and directional propagation of light	17
1.5.6 Applications towards EP based sensing	17
1.5.7 Encirclement dynamics around EPs: Exploring chiral and topological effects	19
1.5.8 Nonreciprocal light transmission: Onset of giant nonreciprocity near EP	21
1.6 Scope of the thesis	22
1.7 Organization of the thesis	23
2 Chirality breakdown around non-interacting multiple second order EPs in gain-loss as-	
sisted planar optical waveguide	27
2.1 Introduction	27
2.2 Theoretical Foundations of an Exceptional Point: An Overview of Concepts and Fundamentals	29
2.2.1 Analytical structure of an EP2	29
2.3 The topological aspect of an EP	31
2.4 Adiabatic theorem and EP encirclement	32
2.5 Design of an gain-loss assisted optical waveguide and hosting of noninteracting EP2s	36
2.5.1 Design of a waveguide	36
2.6 Encounter of two non interacting EP2s	37
2.7 Analysis of modes near the identified EP2s: Progressing Toward β -Switching	38
2.8 Beam propagations dynamics following the dynamical EP2s encirclement scheme: Toward a nonchiral mode conversion	40
2.8.1 Parameter space mapping to realize the dynamical EP2s encirclement schemes	40
2.8.2 Beam propagation simulation results following the dynamical encirclement around EP2s	41
2.9 Analysis of the nonadiabatic corrections: An analytical treatment	43
2.10 Summary	44

3	Exotic light dynamics around higher order exceptional points: Towards higher order mode conversion	45
3.1	Introduction	45
3.2	Nonadiabatic modal dynamics around a third-order Exceptional Point	46
3.2.1	An analytic framework of an EP3	47
3.2.2	Design of the optical waveguide and encountering multiple EP2s	48
3.2.3	Effect of parametric encirclement around an EP3 in the presence of multiple EP2s	50
3.2.4	Dynamical parameter encirclement and beam propagation results	52
3.2.5	Analytical treatment for unconventional nonadiabatic modal propagations	53
3.3	Exotic light dynamics around an exceptional point of order four	54
3.3.1	An analytic framework of an EP4 in the presence of multiple EP2s	55
3.3.2	Design of a gain-loss assisted planar optical waveguide and encounter of an EP4	56
3.3.3	Modal propagation characteristics through the waveguide in the presence of multiple EP2s	58
3.3.4	Dynamical Parametric Encirclement: Beam Propagation Dynamics	61
3.3.5	Analytical treatment For unconventional higher order modal propagation	64
3.4	Summary	66
4	Exceptional points in 1D photonic bandgap waveguide	67
4.1	Introduction	67
4.2	Light dynamics around an exceptional point in a 1D photonic bandgap waveguide	70
4.2.1	Design of a 1D Bragg reflection waveguide to host an EP2 and encircled parametrically	70
4.2.2	Dynamical encirclement of an EP toward asymmetric-mode-conversion process	73
4.3	Hosting multiple exceptional points in 1D photonic bandgap waveguide for mode engineering	74
4.3.1	Design of a 1D Bragg reflection waveguide to host multiple non interacting EP2s and encircled parametrically	74
4.4	Summary	78
5	Reverse-chiral response of two $\mathcal{T}$-symmetric optical systems hosting conjugate exceptional points	79
5.1	Introduction	79
5.2	Reverse-chiral response of two $\mathcal{T}$ -symmetric optical planar waveguides hosting conjugate EP2s	82
5.2.1	Design of two complementary waveguides to host parametrically encircled conjugate EPs	82
5.2.2	Dynamical encirclement of two conjugate EPs toward reverse-chiral response in asymmetric mode-conversion process	84
5.2.3	Validation of reverse-chiral response from the nonadiabatic correction terms	85
5.3	Robust reverse chiral light dynamics around conjugate exceptional points in 1D photonic bandgap waveguides	87
5.3.1	Design of two complementary 1D photonic bandgap waveguides to host parametrically encircled conjugate EP2s	87
5.3.2	Dynamical encirclement of two conjugate EP2s toward reverse-chiral response	89
5.4	Summary	93
6	Effect of nonlinearity in gain-loss assisted photonic systems hosting Exceptional Points	95
6.1	Introduction	95
6.2	Effect of a local nonlinearity on the light dynamics around an exceptional point	96
6.2.1	An analytical model analogous to a dual-mode planar waveguide	96
6.2.2	Optical waveguide hosting an asymmetric mode conversion scheme	97
6.2.3	Effects of nonlinearity on beam dynamics	99
6.2.4	Analytical approach toward the nonadiabatic corrections in the beam dynamics	102

6.3	Nonlinearity-induced anomalous mode collapse and nonchiral asymmetric mode switching around multiple exceptional points	104
6.3.1	Design of an optical waveguide	104
6.3.2	Chiral light propagation scheme in the absence of nonlinearity	105
6.3.3	Nonchiral light propagation scheme in the presence of nonlinearity	106
6.3.4	An analytical treatment to describe unconventional light propagation schemes	109
6.4	Summary	110
7	Exploring anomalous light dynamics around higher-order conjugate exceptional points with local nonlinearity	111
7.1	Introduction	111
7.2	Results and discussions	112
7.2.1	Design of two complementary planar optical waveguides to host higher order conjugate EPs	112
7.2.2	Adiabatic Modal Dynamics: Encounter of higher order conjugate EPs	115
7.2.3	Dynamical parametric encirclement: Beam propagation dynamics around conjugate EP3 in the absence of nonlinearity	116
7.2.4	Dynamical parametric encirclement: Non-chiral beam propagation dynamics in the presence of nonlinearity	119
7.3	Analytical treatment For nonlinearity induced light dynamics	122
7.4	Summary	124
8	Conclusion and future scope	125
