Abstract ix
Acknowledgements xi
Contents xv
List of Figures xviii
List of Tables xix
List of Symbols xxi
List of Abbreviations xxiii

1 Introduction and review of literature **1**
1.1 Introduction 1
1.2 Review of Literature 2
1.2.1 Some important reliability measures 2
1.2.2 Counting Processes 4
1.2.3 Shock models 13
1.2.4 Stochastic orders and stochastic ageings 20
1.2.5 Some useful distributions 22
1.3 A Brief Discussion on the Main Results of the Thesis 25

2 On the time-dependent δ-shock model **29**
2.1 Introduction 29
2.2 Model Formulation 32
2.3 Reliability Characteristics of the Model 33
2.4 A Special Case: Linear Time-Dependent δ-Shock Model 42
2.4.1 Distribution for a fatal shock 42
2.4.2 Stochastic comparison of lifetimes for two systems 45
2.4.3 Failure rate 46
2.5 Application: Optimal Replacement Policy 49

3 On general δ-shock model **55**
3.1 Introduction . . . 55
3.2 Model Formulation . . . 56
3.3 Reliability Characteristics of the Model . . . 57
3.3.1 Reliability indices . . . 58
3.3.2 Stochastic comparisons . . . 60
3.4 A Special Case . . . 62
3.4.1 Reliability function . . . 62
3.4.2 Distribution for a fatal shock . . . 66
3.4.3 Mean lifetime . . . 73
3.5 Application: Optimal replacement policy . . . 78

4 On history-dependent mixed shock models **81**
4.1 Introduction . . . 81
4.2 Model Description . . . 82
4.3 Reliability Characteristics of the Model . . . 83
4.3.1 Survival function . . . 83
4.3.2 Mean lifetime . . . 87
4.3.3 Failure rate . . . 88
4.4 Applications . . . 92
4.4.1 Optimal replacement policy . . . 93
4.4.2 Optimal mission duration . . . 94

5 Phase-type mixed Poisson process **99**
5.1 Introduction . . . 99
5.2 Preliminaries . . . 101
5.3 Poisson PH Process and Its Properties . . . 104
5.4 Application: Shock Models . . . 112
5.4.1 Extreme shock model . . . 112
5.4.2 Stochastic failure rate model . . . 116
5.4.3 δ-shock model . . . 119

6 A general class of shock models **123**
6.1 Introduction . . . 123
6.2 Model Formulation and Specific Cases . . . 124
6.3 Survival of Systems Under Shocks . . . 127
6.3.1 Survival function . . . 128
6.3.2 Failure rate function . . . 134

6.3.3 Mean residual lifetime and mean lifetime . . . 137
6.3.4 Stochastic comparisons . . . 141
6.4 Illustrative Examples . . . 143
6.5 Application: Optimal Mission Duration . . . 149

7 Shock models based on RPMML **153**
7.1 Introduction . . . 153
7.2 Supplementary Results . . . 155
7.2.1 Comparison of two ML distributions . . . 155
7.2.2 Comparison of two MML distributions . . . 156
7.2.3 RPMML . . . 158
7.3 Shock Models Based on the RPMML . . . 158
7.3.1 Generalized extreme shock model . . . 160
7.3.2 Generalized run shock model . . . 162
7.4 Applications . . . 163
7.4.1 Optimal replacement time . . . 163
7.4.2 Optimal mission duration . . . 165

8 On survival of coherent systems **169**
8.1 Introduction . . . 169
8.2 Model Description . . . 170
8.3 General Model . . . 172
8.4 Some Special Cases . . . 174
8.4.1 PGGP . . . 175
8.4.2 PPHP . . . 182
8.4.3 RPMML . . . 186
8.5 Application: Optimal Replacement Policy . . . 188

9 Conclusions and future work **193**
9.1 Conclusions . . . 193
9.2 Future Work . . . 195
List of Publications from the Thesis . . . 199
Bibliography . . . 201
