Chapter 1: Introduction	1
1.1 IMPORTANCE OF Al-Si ALLOYS	1
1.2 DEFORMATION METHODS AND MICROSTRUCTURE DEVELOPMENT	2
1.3 OBJECTIVES OF PRESENT WORK	3
1.4 OUTLINE OF THE THESIS PRESENTED	5
Chapter 2: Literature Review	7
2.1 IMPORTANCE OF PURE Al AND Si	7
2.2 PROCESSING METHODS OF Al-Si ALLOYS	9
2.3 MICROSTRUCTURAL EVOLUTION UNDER DIFFERENT PROCESSING CONDITIONS	12
2.3.1 Microstructure Evolution during Melting and Casting	12
2.3.2 Microstructure Refinement/Modification Techniques	13
2.4 DEFORMATION BEHAVIOR OF THE METALS AND ALLOYS	23
2.4.1 Room Temperature Deformation of Metal and Alloys	24
2.4.2 High-Temperature Deformation of Metals and Alloys	28
2.5 METALLOGRAPHIC OBSERVATIONS	34
Chapter 3: Materials and Experimental Methods	37
3.1 SELECTION OF Al-Si ALLOY COMPOSITIONS	37
3.2 PROCESSING OF Al-Si ALLOYS	38
3.2.1 Melting and Casting of Al-Si Alloys	38
3.2.2 Hot Extrusion Process of Al-Si Alloys	40
3.2.3 Severe Plastic Deformation of Al-Si Alloys (FSP and HPT)	41
3.3 SAMPLE PREPARATION FOR DIFFERENT TESTING METHODS	43
3.3.1 Metallography Samples	43
3.3.2 Mechanical Testing Samples	43
3.4 COMPOSITION AND MICROSTRUCTURE CHARACTERIZATION	44
3.4.1 Chemical Composition Analysis	44
3.4.2 Optical and Scanning Electron Microscopy	45
3.5 MECHANICAL TESTING	46
3.5.1 Microhardness (HV)	46
3.5.2 Tensile and Compression Tests	46
3.5.3 Fractography	47
3.6 DATA ANALYSIS PROCEDURES FOR STUDYING THE FLOW BEHAVIOR	47
Chapter 4: Results	53
4.1 MICROSTRUCTURE EVOLUTION	53
4.1.1 As-cast Microstructure of Al-Si Alloys	53
4.1.2 Microstructure of Mechanically Processed Al-Si Alloys	55
4.2 DEFORMATION BEHAVIOR AND MECHANICAL PROPERTIES	67
4.2.1 Room Temperature Deformation of Al-Si Alloys	67
4.2.2 High-Temperature Deformation Behaviour of Al-Si Alloys	87
Chapter 5: Discussion	123
5.1 COMPARISON OF PRESENT OUTCOMES WITH THE LITERATURE	123
5.1.1 Composition-Structure Relationship	123
5.1.2 Process-Structure Relationship	124

5.2	MECHANISM FOR DEFORMATION	133
	5.2.1 Room temperature deformation	133
	5.2.2 High-temperature deformation	136
5.3	INTER-RELATIONSHIP BETWEEN DIFFERENT PROPERTIES	143
	5.3.1 Nature of Flow Hardening and Flow Softening	143
	5.3.2 Pre-and Post-Deformation Properties	146
Chapter 6: Summary and Conclusions		147
6.1	SUMMARY	147
6.2	CONCLUSIONS AND REMARKS	148
6.3	SUGGESTIONS FOR FUTURE WORK	149
6.4	CLOSING COMMENTS	149
