Abstract	iv
Acknowledgements	vi
Contents	vii-x
List of Figures	xi-xiv
List of Tables	xv
List of Symbols	xvi
List of Abbreviations	xvii
Chapter 1: Introduction to Thesis	1 – 4
1.1 Introduction	1
1.2 Purpose of the Study	1- 2
1.3 Relevance of the Work	2
1.4 Author’s Contributions	2-3
1.5 Scope of Work	3
1.6 Steps adopted in the research work	3
1.7 Organization of Thesis	4
Chapter 2 : Review of Literature	5 – 10
2.1 Introduction	5
2.2 IR Thermography of exhaust plume : A Review	5 – 6
2.3 Radiance and Spectral radiance of exhaust emissions : A Review	7
2.4 IR Signature simulated decoys : A Review	7 – 8
2.5 Exhaust emission of Diesel Vehicle : A Review	8 – 9
2.5.1 <i>Methods of measuring diesel exhaust</i>	8-9
2.5.2 <i>Exhaust emission test cycles</i>	9
2.6 Research Gaps and Problem formulation	9 - 10
2.7 Motivation and approach for work	10
2.8 Summary	10
Chapter 3 : Calibration of Thermal Imager, Visualization and Exhaust Gas measurement	11 – 21
3.1 Introduction	11
3.2 Electromagnetic Spectrum	11 - 12
3.2.1 <i>Wavelength regions of Infrared radiation</i>	11 - 12
3.2.2 <i>Thermal Infrared (TIR)</i>	12
3.3 Thermal Radiation	12 - 13
3.4 Gas Radiation	13 - 15
3.4.1 <i>Radiation Characteristics of Gases</i>	13
3.4.2 <i>Emission and absorption of Gases</i>	13 - 14
3.4.3 <i>Infrared imaging of Gases</i>	14 - 15
3.4.4 <i>Transmission of IR radiation in the atmosphere</i>	15
3.5 Thermal Signature Visualization of exhaust emission using Thermal Imager	15-16
3.6 Terminologies of Thermal Imager	16
3.6.1 <i>Field of View (FOV)</i>	16
3.6.2 <i>Instantaneous Field of View (IFOV)</i>	16
3.6.3 <i>Temperature Sensitivity or Noise Equivalent Temperature Difference (NETD)</i>	16
3.7 Detectors and Thermal imagers	16 - 17
3.7.1 <i>Thermal detector</i>	16
3.7.2 <i>Photon detectors or Quantum detectors</i>	17
3.7.3 <i>MWIR Thermal Imager</i>	17
3.7.4 <i>LWIR Thermal Imager</i>	17
3.8 Calibration of Thermal Imager	17 - 19
3.8.1 <i>Black body source</i>	17 - 18

	3.8.2 Calibration procedure for thermal imager	18 - 19
	3.8.3 Infrared neutral density filter (NDF)	19
3.9	Portable Gas Analyzer	19 - 20
	3.9.1 Working method of gas analyzer	19 -20
	3.9.2 Gas sensors	20
3.10	Assumption made in the thesis	20
Chapter 4: Thermal Signature measurement of diesel exhaust species in 3 to 5 micron waveband		21 - 40
4.1	Introduction	21
4.2	Experimental Set up for measurement of exhaust gas species and thermal signature	21 - 24
	4.2.1 Radiometric Thermal Imager	22
	4.2.2 Portable Gas Analyzer	23
	4.2.3 Vehicles Specification	24
4.3	Specifications of diesel fuel	24
4.4	Measurement Methodology	25
4.5	Diesel exhaust gas species data for Truck	25 - 28
	4.5.1 Truck in idle engine running condition	25 - 27
	4.5.2 Truck in accelerating engine running condition	27 - 28
4.6	Thermal images of diesel exhaust gas species of Truck	28 - 29
4.7	Analysis of thermal images of diesel exhaust gas species of Truck	29 - 33
	4.7.1 Introduction to ENVI Software	29 - 30
	4.7.2 Thermal image analysis of Truck using ENVI Software	30 - 31
	4.7.3 Thermal image analysis of Truck using Altair Software	32 - 33
4.8	Diesel exhaust gas species data for Bus	33 - 36
	4.8.1 Bus in idle engine running condition	33 - 35
	4.8.2 Bus in accelerating engine running condition	35 - 36
4.9	Thermal images of diesel exhaust gas species of Bus	37
4.10	Analysis of thermal images of diesel exhaust gas species of Bus	38 - 40
	4.10.1 Thermal image analysis of Bus using ENVI Software	38 - 39
	4.10.2 Thermal image analysis of Bus using Altair Software	39 - 40
4.11	Summary	40
Chapter 5 : Thermal radiance measurement and spectral radiance computation for diesel exhaust gas species		41 - 53
5.1	Introduction	41
5.2	Radiance and Spectral Radiance	41
5.3	Radiance measured by calibrated radiometric thermal imager	41-44
	5.3.1 Radiance measurement of Truck exhaust smoke in idle engine running Condition	41-42
	5.3.2 Radiance measurement of Truck exhaust smoke in accelerating engine running condition	42-43
	5.3.3 Radiance measurement of Bus exhaust smoke in idle engine running condition	43
	5.3.4 Radiance measurement of Bus exhaust smoke in accelerating engine running condition	44
5.4	HITRAN molecular spectroscopic data	44- 45
5.5	Computation of spectral intensity of gas species	45 -48
	5.5.1 Attenuation of Radiation by a low temperature Gas	45
	5.5.2 Spectral radiance computation for Truck exhaust gas CO under idle engine running condition	45 - 46
	5.5.3 Spectral radiance computation for Truck exhaust gas species under accelerating engine running condition	46 - 47
	5.5.4 Spectral radiance computation for Bus exhaust gas CO under idle engine running condition	47
	5.5.5 Spectral radiance computation for Bus exhaust gas species under accelerating engine running condition	47 -48

5.6	Exhaust gas spectral radiance analysis of Truck	48- 50
	5.6.1 Spectral radiance of exhaust gas species under idle & accelerated engine running condition of Truck	48-49
	5.6.2 Result and discussion	50
5.7	Exhaust gas spectral radiance analysis of Bus	50 - 52
	5.7.1 Spectral radiance of Bus exhaust gas species under idle & accelerated engine running condition	50 - 52
	5.7.2 Result and discussion	52
5.8	Summary	52 - 53
Chapter 6: Thermal Signature measurement of diesel exhaust species in 8to 14 micron waveband		55 - 65
6.1	Introduction	55
6.2	Experimental set up for measurement of exhaust gas species and thermal signature acquisition	55 - 56
	6.2.1 Hand held Thermal Imager	56
	6.2.2 Portable Gas Analyzer	56
6.3	Specifications of vehicles	56
6.4	Measurement methodology	57
6.5	Diesel exhaust species data for Truck	57
	6.5.1 Truck in idle engine running condition	57
	6.5.2 Truck in accelerating engine running condition	57
6.6	Thermal images of diesel exhaust gas species of Truck	58 - 60
6.7	Analysis of thermal images of diesel exhaust gas species of Truck	61
6.8	Data on diesel exhaust gas species for Bus	61
	6.8.1 Bus in idle engine running condition	61
	6.8.2 Bus in accelerating engine running condition	61
6.9	Thermal images of diesel exhaust gas species of Bus	62 - 64
6.10	Analysis of thermal images of diesel exhaust gas species of Bus	65
6.11	Summary	65
Chapter 7: Development of Mock-up (1:1 scale decoy) of combat Vehicle with thermal signature simulation		67 - 78
7.1	Introduction	67
7.2	Military decoys	67
7.3	Use of military decoys	67 - 68
7.4	Design and development of tank Mock-up(Decoy 1:1 scale)	68 - 69
	7.4.1 Design of the Mock-up	68
	7.4.2 Salient features of the Mock-up	69
7.5	Importance of thermal signature simulation in decoy	69
7.6	Generation of thermal signature in a tank decoy	70 - 74
	7.6.1 Thermal signature simulation in a tank decoy	70
	7.6.2 Surface temperature profile measurement of real tank (1100hrs)	70
	7.6.3 Surface temperature profile measurement of real tank (1800hrs)	70
	7.6.4 Result and discussions on surface temperature profile of real tank	71
	7.6.5 Development of Thermal panels	71
	7.6.6 Development of Automatic temperature controller (ATC)	72
	7.6.7 Validation trial of Automatic temperature controller functioning	73
	7.6.8 Result and discussions	73
7.7	Thermal signature measurement of real tank and Mock-up tank	73 - 74
7.8	Real tank exhaust smoke signature study	75
7.9	Simulation of smoke signature in the tank decoy	75 - 77
	7.9.1 Development of smoke simulation system	76
	7.9.2 Visual image comparison of real tank exhaust smoke and Mock-up tank	76
	7.9.3 Thermal image comparison of real tank exhaust smoke and Mock-up tank	76 - 77
7.10	Field evaluation trial of the tank Mock-up	77 -78
7.11	Outcome of the user trials	78
7.12	Importance of R&D work	78
7.13	Conclusions	78

Chapter 8: Summary and Conclusion	79 - 81
8.1 Introduction	79
8.2 Summary	79 - 80
8.3 Conclusion	80 - 81
Annexure A : Contribution of NO_x to thermal signature	83 - 99
A.1 Introduction	83
A.2 Exhaust emission from diesel engine	83
A.2.1 NO _x formation in diesel engine	83
A.2.2 Effect of NO _x in environment	83
A.3 Diesel retrofits technologies for NO _x reduction	84
A.3.1 Exhaust gas recirculation(EGR)	84
A.3.2 Lean NO _x catalyst(LNC)	84
A.3.3 Lean NO _x traps(LNT)	84
A.3.4 Selective catalytic reduction(SCR)	84
A.4 Experimental Setup for measurement of diesel exhaust & temperature	84- 85
A.4.1 Specifications of Portable Gas Analyzer	85
A.4.2 Specifications of Vehicles	85
A.4.3 Specifications of Diesel fuel	85
A.5 Analysis of diesel exhaust emission of Truck	85- 86
A.5.1 Analysis of exhaust emission of Truck under gradual acceleration and deceleration of engine	85
A.5.2 Analysis of concentration and temperature of diesel exhaust emissions of Truck	85 - 86
A.5.3 Analysis of NO, NO ₂ and NO ₂ /NO _x of Truck exhaust	87 - 88
A.5.4 Analysis of NO ₂ /NO _x (%) and temperature of Truck exhaust emission	88 - 89
A.6 Analysis of calculated and measured NO _x concentration of Truck exhaust Emission	90 - 92
A.6.1 Calculated NO _x concentration, sensor measured NO _x concentration and percent (%) error in NO _x value for Truck exhaust	90 - 91
A.6.2 Result and discussion	92
A.7 Analysis of diesel exhaust emission of Bus	92- 96
A.7.1 Analysis of exhaust gas emission of Bus under gradual acceleration and deceleration of engine	92
A.7.2 Analysis of concentration and temperature of diesel exhausts emissions of Bus	92- 93
A.7.3 Analysis of NO, NO ₂ and NO ₂ /NO _x of Bus exhaust	94 - 95
A.7.4 Analysis of NO ₂ /NO _x (%) ratio and temperature of Bus exhaust emission	95 - 96
A.8 Analysis of calculated and measured NO _x concentration of Bus	97 - 98
A.8.1 Calculated NO _x concentration, sensor measured NO _x concentration and percent (%) error in NO _x value for Bus exhaust	97 - 98
A.8.2 Result and discussion	98
A.9 Summary	98 - 99
Annexure B : Specifications of Tank Mock-up	101 - 102
Annexure C : SOP for conduct of field evaluation trials(FETs)	103 - 106
References :	107 - 111
