Abstract vii

List of Publications ix

Acknowledgment xi

1 Introduction 1
- 1.1 The SM particle spectrum . . . 1
- 1.2 Gauge theory of electroweak interactions . . . 2
- 1.3 The SM Lagrangian . . . 3
  - 1.3.1 Spontaneous symmetry breaking and Higgs mechanism . . . 5
- 1.4 The CKM paradigm . . . 7
- 1.5 Limitations of SM . . . 10
  - 1.5.1 Flavour Structure . . . 10
  - 1.5.2 Matter Antimatter asymmetry . . . 10
  - 1.5.3 Dark Matter and Dark Energy . . . 11
  - 1.5.4 Flavour Anomalies . . . 11
- 1.6 Motivation and Plan of the thesis . . . 12

2 B meson decays 15
- 2.1 EFT approach . . . 15
  - 2.1.1 What is EFT? . . . 16
  - 2.1.2 Main ingredients of EFTs . . . 17
  - 2.1.3 An example: Fermi theory of β decay . . . 18
- 2.2 Effective Hamiltonian for B decays . . . 19
- 2.3 Decays induced by quark level transition $b \to s\, l^+\, l^-$ . . . 22
  - 2.3.1 Inclusive semileptonic decay $B \to X_s\, l^+\, l^-$ . . . 24
  - 2.3.2 Exclusive semileptonic decay $B \to K\, l^+\, l^-$ . . . 24
  - 2.3.3 Exclusive semileptonic decay $B \to K^*\, l^+\, l^-$ . . . 26
  - 2.3.4 Purely leptonic decay $B_s \to l^+\, l^-$ . . . 27
- 2.4 Decays induced by quark level transition $b \to c\tau\bar{\nu}$ . . . 27

3 B meson anomalies 31
- 3.1 Introduction . . . 31
- 3.2 Experiments at the B-factories and at the LHC . . . 31
  - 3.2.1 The BaBar experiment . . . 32
  - 3.2.2 The Belle experiment . . . 33
  - 3.2.3 The Belle-II experiment . . . 34
  - 3.2.4 The LHCb experiment . . . 34
- 3.3 Anomalies in $b \to s\, l^+\, l^-$ sector . . . 35
- 3.4 Anomalies in $b \to c\, l\, \bar{\nu}$ sector . . . 38

4 Probing new physics through branching ratio of $B_s^* \to \mu^+\mu^-$ decay 41
- 4.1 Introduction . . . 41

4.2 $B_s^* \to l^+ l^-$ decay . . . 42
4.2.1 $B_s^* \to l^+ l^-$ decay in the SM . . . 42
4.2.2 Branching ratio of $B_s^* \to l^+ l^-$ with new physics contributions . . . 43
4.3 Methodology . . . 45
4.4 Results and Discussions . . . 46
4.5 Conclusions . . . 47

5 Probing new physics through lepton polarization asymmetry of $B_s^* \to \mu^+ \mu^-$ decay 49
5.1 Introduction . . . 49
5.2 Calculation of Longitudinal Polarization Asymmetry for $B_s^* \to l^+ l^-$ decay . . . 49
5.2.1 Longitudinal Polarization Asymmetry in the SM . . . 49
5.2.2 Longitudinal polarization asymmetry in presence of new physics . . . 51
5.3 $\mathcal{A}_{LP}(\mu)$ with new physics solutions . . . 51
5.4 Conclusions . . . 52

6 Correlation between Br($B_s^* \to \tau^+ \tau^-$) and $R_{D,D^*,J/\psi}$ anomaly 55
6.1 Introduction . . . 55
6.2 Effect of new physics in $B_s^* \to \tau^+ \tau^-$ . . . 56
6.3 Conclusions . . . 57

7 New physics in $b \to s e^+ e^-$: A model independent analysis 59
7.1 Introduction . . . 59
7.2 Methodology . . . 60
7.3 Vector/axial-vector new physics . . . 61
7.3.1 Discriminating V/A solutions . . . 62
7.4 Scalar/pseudo-scalar new physics . . . 71
7.5 Tensor new physics . . . 71
7.6 Conclusions . . . 72

8 Probing signature of anomalous tcZ coupling through rare B and K decays 73
8.1 Introduction . . . 73
8.2 Effect of anomalous $t \to cZ$ couplings on rare B and K decays . . . 74
8.3 Constraints on the anomalous tcZ couplings . . . 76
8.3.1 Constraints from $b \to s\,\mu^+\,\mu^-$ sector . . . 76
8.3.2 Constraints from $b \to s\,e^+\,e^-$ sector . . . 77
8.3.3 Constraints from $b \to d\,\mu^+\,\mu^-$ sector . . . 77
8.3.4 Constraints from $s \to d\,\nu\bar{\nu}$ sector . . . 78
8.4 Results and discussions . . . 79
8.4.1 $\mathcal{B}(t \to c\,Z)$ . . . 79
8.4.2 $\mathcal{B}(K_L \to \pi^0\,\nu\,\bar{\nu})$ . . . 80
8.4.3 CP violating observables in $B \to (K^*,\, K)\,\mu^+\,\mu^-$ . . . 80
8.5 Conclusions . . . 81

9 Conclusions 83

Appendix A 85
