Abstract		vii
Acknowledgments		ix
Contents		xi
List of Figures		xv
List of Tables		xvii
List of Symbols		xix
List of Abbreviations		xxi
Chapter 1: Introduction		1
1.1	Motivation	1
1.2	Supramolecular Chemistry	1
1.3	History of calix[4]arenes	3
1.4	Conformations of calix[4]arene	4
1.5	Chirality in calix[4]arene	4
1.6	Asymmetric Catalysis	5
1.7	Objective of thesis	6
1.8	Organization of thesis	6
Chapter 2: Literature Review		7
2.1	Calix[4]arene based catalysts in wide range of applications	7
2.2	Asymmetric Michael Addition reaction utilizing calix[4]arene-based catalysts	12
2.3	Asymmetric Alkylation reaction utilizing calix[4]arene-based catalysts	15
2.4	Asymmetric Henry reaction utilising calix[4]arene- based catalysts	17
2.5	Asymmetric Strecker reaction- Brief literature review	18
Chapter 3: *Synthesis and Characterization of calix[4]arene based homogeneous catalysts*		19
3.1	Introduction	19
	3.1.1 Background of calix[4]arene as an organocatalysts	19
	3.1.2 Background of calix[4]arene as Phase Transfer Catalysts	20
3.2	Synthesis of calix[4]arene catalysts	21
	3.2.1 Cinchonidine appended calix[4]arene	21
	3.2.2 Synthesis of Cinchona anchored calix[4]arene	22
	3.2.3 *Synthesis of Cinchona-Functionalized Crown Ether-Strapped Calixarene*	23
	3.2.4Synthesis of α-Methylbenzylamine functionalized crown-ether-appended calix[4]arene	25
	3.2.5 Synthesis of camphor sulfonyl functionalised crown-ether-appended calix[4]arene	26
3.3	*Experimental Section*	27
Chapter 4: *Experimental and Computational Studies on Cinchona anchored Calixarene catalysed Asymmetric Michael Addition reaction*		37
4.1	Introduction	37
	4.1.1 Earlier work	37
	4.1.2 Our work	38
4.2	Experimental *Section*	38

	4.2.1 Enantioselective Michael Addition of acetylacetone to nitroolefins and effect of catalyst	38
4.3	Mechanistic explanation	41
4.4	Recyclability of catalyst	43
4.5	Conclusion	44
4.6	Product analysis	44
Chapter 5: *Enantioselective Alkylation of Glycine Imines Using a Cinchona-Functionalised crown ether strapped calixarene Phase-Transfer Catalyst*		51
5.1	Introduction	51
	5.1.1 Earlier work	51
	5.1.2 Our work	52
5.2	*Experimental Section*	52
	5.2.1 Enantioselective alkylation of Glycine Imines and effect of catalysts	53
5.3	*Recyclability of catalysts*	56
5.4	Conclusion	56
5.5	Product Analysis	56
Chapter 6: α-Methylbenzylamine functionalized Crown-Ether-Appended Calix[4]arene Phase Transfer Catalyst for Enantioselective Henry Reaction		63
6.1	Introduction	63
	6.1.1 Earlier Work	63
	6.1.2 Our work	64
6.2	Experimental *Section*	64
	6.2.2 Enantioselective Henry reaction of aldehyde to nitromethane and effect of catalysts	65
6.3	*Mechanistic explanation*	68
6.4	*Recyclability of catalysts*	69
6.5	Conclusion	69
6.6	*Product analysis*	70
Chapter 7: Scalable Organocatalytic One Pot Asymmetric Strecker Reaction Via Camphor Sulfonyl Functionalised Crown-Ether-Tethered Calix[4]arene		77
7.1	Introduction	77
	7.1.1 Our work	77
7.2	Experimental *Section*	78
	7.2.1 Enantioselective Strecker reaction of aldehyde with amine and effect of catalysts	78
7.3	*Mechanistic Explanation*	82
7.4	*Application of camphor sulfonyl catalysed asymmetric cyanation reaction in the synthesis of Clopidogrel*	82
	7.4.1 Procedure for the Synthesis of S-Clopidogrel	82
7.5	*Recyclability of catalysts*	83
7.6	Conclusion	83
7.7	*Product Analysis*	83
Chapter 8: *Conclusion*		89
8.1	Summary	89
8.2	Future scope	91
Publications		93
Annexure A: NMR and HPLC spectras		95

A.1	NMR Spectra of catalysts	95
A.2	HPLC Chromatogram	99
References		101
