<i>Abstract</i>	<i>page</i>
<i>Acknowledgements</i>	<i>v</i>
<i>Contents</i>	<i>vii</i>
<i>List of Figures</i>	<i>ix</i>
<i>List of Tables</i>	<i>xi</i>
<i>List of Symbols</i>	<i>xv</i>
	<i>xvii</i>
Chapter 1: Introduction	1
Chapter 2: q-deformed Ricker Map	15
2.1 Introduction	15
2.2 Deformed Ricker map	15
2.2.1 <i>Fixed points using Lambert W function</i>	17
2.3 Bifurcation analysis and coexistence of attractors	19
2.3.1 <i>Intersection between the fold and flip bifurcation curves</i>	21
2.3.2 <i>Coexistence of the attractors</i>	24
2.4 Topological entropy	25
2.4.1 <i>Computation of topological entropy</i>	26
2.5 Bubbling and Hydra Paradox	28
2.5.1 <i>Bubbling effect</i>	28
2.5.2 <i>Hydra Paradox</i>	29
2.6 Conclusion	31
2.7 Appendix	32
Chapter 3: q-deformed Homographic Map	35
3.1 Introduction	35
3.2 Formation of q-Homographic Ricker map	35
3.2.1 <i>Fixed points of q-Homographic map</i>	37
3.2.2 <i>Allee Effect</i>	39
3.3 Bifurcation analysis of q-Homographic map	41
3.3.1 <i>Coexistence of attractors</i>	42
3.3.2 <i>Topological Entropy</i>	44
3.4 Chaotification of the deformed Homographic map	48
3.4.1 <i>Bifurcation Diagram</i>	49
3.4.2 <i>Lyapunov Exponents</i>	49
3.4.3 <i>Sensitivity to initial conditions and control parameters</i>	52
3.5 Chaos Control	54
3.6 Conclusion	56
Chapter 4: 2D Homographic Ricker Map	59
4.1 Introduction	59
4.2 The 2D Homographic Ricker competition model	59
4.3 Geometry of 2D Homographic map	62
4.4 Fixed points and stability	71
4.4.1 <i>Stability of the fixed points</i>	73
4.5 Bifurcation Analysis	77
4.5.1 <i>Fold and flip bifurcation curves</i>	82
4.6 Numerical Simulations	86
4.7 Conclusion	91
4.8 Appendix	92
Chapter 5: 2D delayed Homographic Ricker Map	93
5.1 Introduction	93
5.2 2D delayed Homographic Ricker Map	93
5.3 Existence and uniqueness of the equilibrium	95
5.4 Neimark Sacker bifurcation in 2D delayed map	99
5.5 Numerical Simulations	101
5.6 Conclusion	103

Chapter 6: Combinatorics of Symmetric Bimodal Maps	105
6.1 Introduction	105
6.2 Construction of Hofbauer Tower	105
6.3 The Algorithm	113
6.4 Extended Hofbauer Tower	116
6.5 Splitting of the kneading invariants	120
6.6 Conclusion	123
Chapter 7: Summary and Future scope	125
7.0.1 <i>Future Scope</i>	126
List of publications	127
Bibliography	129
