Abstract	i
Acknowledgements	ii
Contents	iii
List of Figures	v
List of Tables	ix
List of Symbols	x
List of Abbreviations	xi
Chapter 1: Introduction	
1.1 Formaldehyde gases in indoor air	1
1.2 Literature review on formaldehyde sensing	3
1.2.1 Chemiresistive gas sensors	4
1.2.2 Various parts of Metal oxide gas sensors	4
1.2.3 Gas sensing mechanism of metal oxide gas sensor	6
1.2.4 Types of metal oxide materials for gas sensing	7
1.2.5 Characteristics of metal oxide gas sensors	8
1.2.6 Fabrication technology of metal oxide sensors	8
1.3 Methods for improving gas response towards target gases	11
1.3.1 Improvement of sensitivity	12
1.3.2 Improvement of selectivity	14
1.4 Motivation	15
1.5 Objective	16
1.6 Thesis Outline	17
Chapter 2: Sensor Fabrication facilities, Characterization tools and techniques	
2.1 Introduction	20
2.2 Sensor fabrication facilities and related instruments	20
2.2.1 Chemical bench	20
2.2.2 RF Sputtering	21
2.2.3 Pulse Laser Ablation system	22
2.2.4 Annealing furnace and oven	23
2.2.5 Wire bonding machine	23
2.3 Material Characterization Tools and Techniques	24
2.3.1 Surface profiler and sheet resistance measurement system	24
2.3.2 X-Ray Diffraction (XRD) system	25
2.3.3 Atomic Force Microscopy (AFM)	26
2.3.4 Field Emission Scanning Electron Microscopy (FESEM)	27
2.3.5 Thermal Imaging Camera	28
2.4 TCR measurement system	29
2.5 Computer controlled LabVIEW based gas sensor test set-up	29
Chapter 3: Fabrication & Characterization of microhotplate for metal oxide gas sensors	
3.1 Introduction	32
3.2 Experimental details	33
3.2.1 Fabrication of Au microheater and Interdigitated Electrode (IDE)	33
3.2.2 Characterization of Au microheater based gas sensor platform	35
3.3 Results and Discussions	35
3.3.1 Structural characterization of microheater	35
3.3.2 Measurement of resistance of the fabricated microheater	34
3.3.3 Measurement of TCR and Electro-thermal analysis	36
3.3.4 Measurement of Heat Distribution Profile of microhotplate	38
3.3.5 Repeatability and Reliability test of microheater	39
3.4 Characterization of Nichrome (Ni-Cr) heater based gas sensor platform	40
3.5 Conclusion	41

Chapter 4: Formaldehyde gas sensing using pristine metal oxides

4.1	Introduction	43
4.2	Experimental details	44
	4.2.1 Deposition of SnO ₂ and fabrication of SnO ₂ thin film based gas sensors	44
	4.2.2 Synthesis of ZnO nanoparticles and fabrication of ZnO based sensors	45
4.3	Characterization	46
	4.3.1 Structural and morphological characterization of gas sensing materials	46
	4.3.2 Gas sensing performance test of the fabricated sensors	46
4.4	Results and discussions	47
	4.4.1 Structural and morphological analysis of gas sensing materials	47
	4.4.2 Gas response of the fabricated sensors	49
4.5	Conclusions	58

Chapter 5: Formation of heterojunction via surface decoration for enhanced formaldehyde detection

5.1	Introduction	59
5.2	Experimental details	61
	5.2.1 Fabrication of n-ZnO/n-SnO ₂ (n-n) heterojunction based sensors	61
	5.2.2 Fabrication of p-NiO/n-SnO ₂ (p-n) heterojunction based sensors	62
5.3	Characterization	63
	5.3.1 Structural and morphological characterization of gas sensing materials	63
	5.3.2 Gas sensing performance test of the fabricated sensors	63
5.4	Results and discussions	63
	5.4.1 Structural and morphological analysis of gas sensing materials	63
	5.4.2 Gas response of the fabricated sensors	66
5.5	Conclusions	53
		77

Chapter 6: formaldehyde gas sensing mechanism and Modelling

6.1	Discussion on formaldehyde gas sensing mechanism	78
	6.1.1 Formaldehyde gas sensing mechanism of SnO ₂ pristine metal oxide	78
	6.1.2 Formaldehyde gas sensing mechanism of ZnO pristine metal oxide	80
	6.1.3 Formaldehyde gas sensing mechanism of ZnO/SnO ₂ n-n heterojunction	81
	6.1.4 Formaldehyde gas sensing mechanism of NiO/SnO ₂ p-n heterojunction	82
6.2	Gas sensor modelling	84
	6.2.1 Gas adsorption-desorption kinetics in metal oxide	84
	6.2.2 Changes in conductance of sensor due to adsorption-desorption of gases	84
	6.2.3 Transient response-recovery cycles with fitting curve of pristine SnO ₂ sensor	85
	6.2.4 Transient response-recovery cycles with fitting curve of p-NiO/n-SnO ₂ sensor	89
6.3	Conclusion	92

Chapter 7: Conclusions and Future Work

7.1	Conclusions	94
7.2	Detection of formaldehyde gas in formalin-treated fish sample	
7.3	Future Work	96
