Abstract		*I*
Acknowledgements		*iii*
Contents		*v*
List of Figures		*ix*
List of Tables		*xi*
List of Symbols		*xiii*
List of Abbreviations		*xv*
Chapter 1: Introduction		
1.1	Purpose and Objectives of the Study	*1*
1.2	Brief Results, Scope, and Future Prospects of the Work	*2*
Chapter 2: Review of Literature		
2.1	Microalgae-based Circular Bioeconomy	*5*
2.2	*Chlamydomonas reinhardtii* and its Characteristics	*6*
2.3	Different Trophic Modes for *Chlamydomonas* Cultivation	*7*
	2.3.1 Autotrophic Cultivation	*7*
	2.3.2 Heterotrophic Cultivation	*8*
	2.3.3 Mixotrophic Cultivation	*8*
2.4	Factors Affecting *Chlamydomonas* Growth	*8*
	2.4.1 Media Composition and pH	*8*
	2.4.2 Temperature	*9*
	2.4.3 Salinity or Salt Stress	*9*
	2.4.4 Agitation and Dissolved Oxygen Concentration	*9*
	2.4.5 Light	*9*
	2.4.6 Cultivation Conditions	*10*
2.5	Waste Valorization through *Chlamydomonas* Cultivation	*10*
2.6	CO_2 Mitigation through *Chlamydomonas* Cultivation	*11*
2.7	Microalgae-based Biorefinery for Bioproduct Synthesis	*12*
	2.7.1 Biofuels	*12*
	2.7.2 Microalgal Lipids	*12*
	2.7.3 Hydrogen	*12*
	2.7.4 Value-added Products	*13*
2.8	Microalgal Carotenoids and their Therapeutic Applications	*14*
2.9	Carotenoid Biosynthesis in Microalgae	*15*
	2.9.1 Optimization of Culture Media/ Operational Parameters	*16*
	2.9.2 Biotechnological Approaches	*16*
2.10	Genetic Transformation of *Chlamydomonas* and Methods Available	*17*
2.11	Molecular Toolkits for *Chlamydomonas* Genetic Engineering	*18*
	2.11.1 Promoters and Terminators	*18*
	2.11.2 Reports and Selection Markers	*18*
	2.11.3 Introns and 3'-UTRs	*19*
2.12	Roadmap for Producing GM Microalgal Lines	*19*
2.13	Methods for GM Microalgae Confirmation	*20*
2.14	Biocontainment of GM Microalgae	*20*
2.15	Types of Microalgae Cultivation Systems	*21*
	2.15.1 Open Ponds	*21*
	2.15.2 Enclosed Systems and Photobioreactors	*22*
2.16	Bottlenecks Associated with Existing Microalgae Cultivation Systems	*22*
2.17	MFC Principle and Components	*23*
	2.17.1 Electrochemically Active Microorganisms	*23*
	2.17.2 Anode	*25*

2.17.3 *Cathode* 25
2.17.4 *Membrane/ Separator* 25
2.18 MFC Performance and Power Losses 26
2.19 Tools and Techniques to Study MFC Performance 26
2.19.1 *Voltage Measurement* 26
2.19.2 *Polarization Curve and Power Density* 27
2.19.3 *Cyclic Voltammetry* 28
2.19.4 *Electrochemical Impedance Spectroscopy* 28
2.19.5 *Coulombic Efficiency* 29
2.19.6 *Analytical Chemistry* 29
2.19.7 *Microalgae Growth Kinetics* 29
2.19.8 *Enzyme Assays* 30
2.19.9 *Microbial Community Profiling* 30
2.19.10 *Scanning Electron Microscopy* 30
2.20 Factors Affecting MFC Performance
2.21 *Economic Assessment of the MFC systems* 30
2.22 Applications of MFC 31
2.22.1 *Wastewater Treatment and Metal Recovery* 31
2.22.2 *Bioremediation* 32
2.22.3 *Electricity Generation* 32
2.22.4 *Microalgae Cultivation and CO_2 Sequestration* 32
2.22.5 *Biosensors* 32
2.23 MFCs Integration with Microalgae Cultivation 33
2.23.1 *Role of Microalgae in PMFC* 33
2.23.2 *PMFC Configurations for Microalgae Cultivation* 33
2.23.3 *Microalgae Strains Employed at PMFC Cathode Chamber* 35

Chapter 3: Material and Methods
3.1 Materials 39
3.2 Microalgae Cultivation and Measurements 39
3.2.1 *Cultivation Medium and Operational Conditions* 39
3.2.2 *Microalgae Biomass Harvesting and Drying* 40
3.2.3 *Lipid Extraction and Gravimetric Analysis* 40
3.2.4 *Microalgae Growth and Biomass Productivity* 40
3.2.5 *Pigment Extraction and Quantification* 40
3.2.6 *High-Performance Liquid Chromatography* 41
3.2.7 *Preparation of Algae Biomass Methanol Extract* 41
3.2.8 *Total Phenol Content and Antioxidant Activity of ABME* 41
3.2.9 *Antimicrobial Activity of ABME using Agar Well Diffusion Assay* 41
3.3 MFC Reactor Fabrication and Operation 42
3.3.1 *MFC Configuration* 42
3.3.2 *Anolyte and Catholyte Preparation* 43
3.3.3 *Wastewater Collection and Characterization* 44
3.4 Analytical Techniques 44
3.4.1 *Chemical Oxygen Demand Estimation* 44
3.4.2 *pH Measurement* 44
3.5 Electrochemical Analysis 44
3.5.1 *Polarization Curve and Power Measurement* 44
3.5.2 *Coulombic Efficiency* 44
3.5.3 *Cyclic Voltammetry* 45
3.6 SEM Analysis 45
3.7 Molecular Biology Techniques 45
3.7.1 *Vector Construction* 45
3.7.2 *Plasmid DNA Extraction from Recombinant E. coli Cells* 46
3.7.3 *Genetic Transformation using Electroporation* 46
3.7.4 *Microalgal Cells Recovery and Selection after Transformation* 46

3.7.5 DNA Extraction from Microalgal Cells 46
3.7.6 Polymerase Chain Reaction for Gene Amplification 46
3.7.7 Southern Hybridization for Copy Number Determination 47
3.7.8 Western Blot Analysis to Study Protein Expression 47
3.8 Statistical Analysis 48

Chapter 4: Performance Evaluation of Photosynthetic Microbial Fuel Cells using *Chlamydomonas reinhardtii* at Cathode
4.1 Experimental 49
4.2 Results and Discussion 50
4.2.1 Voltage Generation 50
4.2.2 Power Output 51
4.2.3 Dissolved Oxygen at Cathode Chamber 53
4.2.4 Electrochemical Analysis 53
4.2.5 COD Removal and Coulombic Efficiency 54
4.2.6 Evaluation of Electrode Surfaces 54
4.2.7 pH at Anode and Cathode Chambers 55
4.2.8 Microalgae Growth at Cathode Chamber 55
4.2.9 Pigment Production 56
4.2.10 Total Phenol Content and Antioxidant Activity of ABME 57
4.2.11 Antibacterial Activity of ABME 57
4.3 Conclusions 58

Chapter 5: Engineering of Ketocarotenoid Biosynthetic Pathway in *Chlamydomonas reinhardtii* through Exogenous Gene Expression
5.1 Experimental 59
5.2 Results and Discussion 60
5.2.1 Genetic Transformation and Transgene Integration Analysis using PCR 60
5.2.2 Preliminary Screening of Transformed Microalgal Lines 60
5.2.3 Analysis of Copy Number in GM Microalgae using Southern Hybridization 62
5.2.4 Analysis of bkt and crt Expression in GM Microalgae using Western Blotting 62
5.2.5 Comparison of GM and WT Microalgae Growth in Batch Cultivation 62
5.2.6 β-Carotene and Astaxanthin Production 63
5.3 Conclusions 72

Chapter 6: Microbial Fuel Cells as Microalgae Bioreactors for Carotenoids and Power Generation
6.1 Experimental 73
6.2 Results and Discussion 75
6.2.1 Voltage Generation 75
6.2.2 COD Removal and Coulombic Efficiency 75
6.2.3 Microalgae Growth at Cathode Chamber – WT v/s GM Microalgae 76
6.2.4 Dissolved Oxygen at Cathode Chamber 78
6.2.5 β-Carotene Production 79
6.2.6 Power Output 84
6.2.7 Electrochemical Analysis 85
6.3 Conclusions 87

Chapter 7: Summary and Conclusions
7.1 Summary 89
7.2 Conclusions 89
7.3 Closing Remarks 90
