Abstract		**vii**
Acknowledgments		**ix**
Contents		**xi-xii**
List of Figures		**xiii-xiv**
List of Tables		**xv**
List of Symbols		**xvii**
List of Abbreviations		**xix**
Chapter 1: Introduction		**1**
1.1	Purpose of the study	**1**
1.2	Heterogeneous Catalytic Hydrogenation and hydrotreatment reaction	**1**
1.3	The application of Pd/Clay for hydrogenation of imine	**3**
	1.3.1 *Hydrogenation of imine*	**3**
	1.3.2 *Clay supported metal catalysts*	**3**
1.4	Hydrotreatment reaction for biofuel application	**4**
	1.4.1 *The development of sustainable biofuel production*	**4**
	1.4.2 *Catalytic hydrotreatment process*	**5**
	1.4.3 *Types of catalysts in hydrotreatment reactions*	**6**
	1.4.4 *Silica alumina-supported metal catalysts*	**6**
	1.4.5 *Deactivation of catalyst*	**7**
1.5	Objective and scope	**8**
Chapter 2: Literature review		**11**
2.1	Clay as a support-brief literature review	**11**
2.2	The use of non-noble and noble metals	**12**
2.3	Imine hydrogenation- brief literature review	**12**
2.4	Metal supported Natural clay for hydrogenation	**13**
2.5	Hydrodeoxygenation (HDO)	**15**
2.6	Summary	**19**
Chapter 3: *Palladium-Incorporated Montmorillonite Clay: A Sustainable Imine Hydrogenation Catalyst*		**21**
3.1	Experimental Techniques	**21**
	3.1.1 Preparation of Schiff base	**21**
	3.1.2 Preparation of catalysts	**21**
	3.1.3 Characterization techniques	**22**
	3.1.4 Hydrogenation of imine	**22**
	3.1.5 Catalyst Reusability	**23**
	3.1.6 Leaching Tests	**23**
3.2	Results and Discussion	**23**
	3.2.1 Characterization of catalyst	**23**
	3.2.2 Optimization of reaction parameters	**30**
	3.2.3 Reusability and metal leaching studies	**34**
3.3	Conclusion	**35**
Chapter 4: *A Comprehensive Investigation of Cobalt Oxide-Modified SiO2-Al2O3 Catalysts: Their Influence on Catalyzing the Conversion of Methyl Oleate into Hydrocarbons*		**37**
4.1	Experimental Section	**37**
	4.1.1 Preparation of catalyst	**38**
	4.1.2 Characterization techniques	**38**
	4.1.3 Procedure for hydroprocessing of methyl oleate	**39**
4.2	Results and Discussion	**39**

4.3	Conclusion	**53**
Chapter 5: *FexNiy/ SiO2-Al2O3 catalyzed hydrodeoxygenation of biorenewable platform molecules*		**55**
5.1	Experimental section	**55**
	5.1.1 Catalyst preparation	**55**
	5.1.2 Characterization techniques	**55**
	5.1.3 Catalytic activity test	**56**
5.2	*Results and Discussion*	**56**
5.3	Conclusion	**69**
Chapter 6: *Conclusions*		**71**
6.1	Summary	**71**
6.2	Future scope	**71**
6.3	Real world application of developed catalytic system.	**72**
Publications		**73**
Annexure A: Materials and methods		**75**
A.1	Reagents	**75**
A.2	Software used	**75**
References		**77**
