Abstract ix
Acknowledgment xi
Abbreviation xiii
Chapter 1: Introduction 1
1.1 Motivation for 5G . . . 1
1.2 5G: Unveiling the Future . . . 2
1.3 5G Spectrum . . . 3
1.4 Planar Technologies for 5G millimeter wave . . . 5
1.5 Substrate Integrated Coaxial Line (SICL) . . . 7
1.6 Integration with Existing Technologies: SICL Transitions . . . 8
1.7 Literature Survey . . . 9
1.7.1 Dipole Antenna . . . 9
1.7.2 Cavity Backed Slot Antenna . . . 12
1.8 Motivation and Scope of this Thesis . . . 14
1.9 Organisation of the Thesis . . . 16
Chapter 2: Substrate Integrated Coaxial Line fed Dipole Antenna Element Designs 19
2.1 Introduction . . . 19
2.2 Comparison of Substrate Integrated Coaxial Line (SICL) and Coplanar Stripline (CPS) technology . . . 20
2.3 Design of Substrate Integrated Coaxial Line based Broadband Dipole Antenna . . . 23
2.3.1 Design and Principle of Operation . . . 23
2.3.2 Parametric Analysis of Antenna Design Parameters . . . 24
2.3.3 Results and Discussion . . . 25
2.4 Design of Substrate Integrated Coaxial Line fed Quasi Yagi Antenna . . . 26
2.4.1 Design and Principle of Operation . . . 27
2.4.2 Results and Discussion . . . 30
2.5 Design of Substrate Integrated Coaxial Line (SICL) Excited Wideband Millimeter Wave Bow-Tie Antenna . . . 31
2.5.1 Design and Principle of Operation . . . 31
2.5.2 Results and Discussion . . . 33
2.6 Design of SICL fed Dual Polarized Dipole Antenna . . . 33
2.6.1 Design . . . 33
2.6.2 Principle of Operation . . . 36
2.6.3 Results and Discussion . . . 36
2.7 Design of SICL fed Ka-band Dual Polarized Dipole Antenna Array . . . 37
2.7.1 Design and Principle of Operation . . . 38
2.7.2 Results and Discussion . . . 40
2.8 Design of Dual Frequency Dual Polarized Antenna Fed by Substrate Integrated Coaxial Line for 5G Millimeter Wave Application . . . 43
2.8.1 Design of Antenna . . . 43
2.8.2 Design of SICL fed Dual Frequency Dual Polarized Antenna . . . 44

2.8.3 Results and Discussion . . . 46
2.9 Conclusions . . . 47
Chapter 3: Substrate Integrated Coaxial Line fed Cavity Backed Slot Antenna Designs with Multifunctional Performance 49
3.1 Introduction . . . 49
3.2 Development of a Slot Antenna Excited by Novel Substrate Integrated Coaxial Line Cavity . . . 50
3.2.1 Design . . . 50
3.2.2 Principle of Operation . . . 51
3.2.3 Results and Discussion . . . 54
3.3 Analysis of Shielded Planar Technology for Design of Millimeter Wave Cavity Backed Slot Antenna . . . 55
3.3.1 Design of Cavity . . . 56
3.3.2 Results and Discussion . . . 57
3.4 Design of a Compact Dual Frequency SICL based Cavity Backed Slot Antenna with High Front to Back Ratio . . . 61
3.4.1 Design . . . 61
3.4.2 Principle of Operation . . . 62
3.4.3 Parametric Analysis . . . 62
3.4.4 Results . . . 64
3.5 Front to Back Ratio Improvement using Higher Order Mode in Substrate Integrated Coaxial Line (SICL) Based Cavity Backed Slot Antenna . . . 65
3.5.1 Design . . . 67
3.5.2 SICL Cavity . . . 67
3.5.3 Working Principle . . . 69
3.5.4 Results . . . 69
3.6 A Novel Half Mode SICL Based Dual Beam Antenna Array for Full Duplex Application . . . 71
3.6.1 Design . . . 71
3.6.2 Development of HMSICL Cavity . . . 72
3.6.3 Half Mode SICL Cavity Fed Monopole Antenna . . . 72
3.6.4 Half Mode SIW Antenna . . . 74
3.6.5 Dual Beam Antenna Array . . . 77
3.6.6 Results . . . 79
3.7 Conclusion . . . 81
Chapter 4: Implementation of Substrate Integrated Coaxial Line based Antenna Array 83
4.1 Introduction . . . 83
4.2 Design of Substrate Integrated Coaxial Line based Slot Antenna Arrays . . . 84
4.2.1 Design of a Substrate Integrated Coaxial Line based 2 x 4 Slot Antenna Array 84
4.2.2 Design of a Substrate Integrated Coaxial Line based Dual Beam 6 x 4 Double Slot Antenna Array . . . 88
4.2.3 Results . . . 91
4.3 SICL Excited Dual Band Crossed Dipole Uniform Array For Endfire Applications . 93
4.3.1 Design and Working Principle . . . 94
4.3.2 Results and Discussion . . . 97
4.4 Substrate Integrated Coaxial Line (SICL) based Millimeter Wave Switching Board and its Application for Antenna Arrays . . . 99
4.4.1 Substrate Integrated Coaxial Line (SICL) based Switching Board . . . 99
4.4.2 SICL based Reconfigurable Dual Linearly Polarized Wideband Antenna Array for 5G Millimeter Wave Applications . . . 101

4.4.3 SICL Switching Board based Dual Beam Pattern Reconfigurable Antenna Array for Endfire Application . . . 106
4.5 HMSICL fed Stacked Monopole Antenna Array . . . 111
4.5.1 Design . . . 111
4.5.2 Results and Discussion . . . 116
4.6 Conclusion . . . 119
Chapter 5: Substrate Integrated Coaxial Line based MIMO Antenna Array Designs 121
5.1 Introduction . . . 121
5.2 High Isolation Wideband SICL Excited Compact MIMO Antenna Array for 5G Endfire Applications . . . 121
5.2.1 Design . . . 123
5.2.2 Results and Discussion . . . 124
5.3 SICL based MIMO Antenna Array for Simultaneous 5G & Beyond Applications . . . 128
5.3.1 Design . . . 129
5.3.2 Results and Discussion . . . 133
5.4 Eight-Element MIMO Antenna System With Pattern and Polarization Diversity with High Isolation . . . 135
5.4.1 Design . . . 136
5.4.2 Results and Discussion . . . 138
5.5 Conclusion . . . 140
Chapter 6: Conclusion and Future Scope 141
6.1 Future Scope . . . 142
