Abstract	v
Acknowledgments	vii
Contents	ix
List of Figures	xi
List of Tables	xiii
List of Symbols	xv
List of Abbreviations	xvi
List of Symbols	xv
List of Abbreviations	xvii
Chapter 1: Introduction	1
1.1 Motivation	1
1.2 Problem Formulation	2
1.3 Contributions	2
Chapter 2: Signal Model and Literature Survey	5
2.1 Signal Model	5
2.1.1 AWGN Signal Model	5
2.1.2 Signal in Fading channel	6
2.1.3 Signal model for Gaussian Mixture Model	7
2.2 Existing Classifiers	7
2.2.1 Likelihood-based Classifiers	8
2.2.2 Feature Based Classification	10
2.3 Machine Learning based classifiers	13
Chapter 3: Extraction of Constellation Signature	15
3.1 Introduction	15
3.2 Constellation Extraction	15
3.2.1 Carrier Frequency Estimation	17
3.2.2 Carrier Frequency Offset Estimation and Correction	18
3.3 Symbol Rate Estimation	20
3.3.1 Symbol rate estimation based on complex envelope	20
3.3.2 Symbol rate estimation based on instantaneous phase	21
3.3.3 Symbol time offset estimation	22
3.3.4 Phase offset estimation	22
Chapter 4: Clustering Analysis of Constellation Signature	27
4.1 Introduction	27
4.2 Clustering Algorithms	27
4.2.1 Ordering points to investigate the clustering structure (OPTICS)	27
4.2.2 k-means Clustering	28
4.3 Estimation of Modulation Order	28
4.4 Estimation of Modulation Domain	29
4.5 Results	32
4.5.1 Proposed Classifier	32
4.5.2 Comparison to related work	33
Chapter 5: Modulation classification through k-medoids clustering	35
5.1 Introduction	35
5.2 Classification using k medoids and similarity score	35
5.2.1 k medoids clustering algorithm	35
5.2.2 Simulation results	37
5.2.3 Comparison to related work	37
5.3 Classification using k medoids and instantaneous phase in flat fading channel	38
5.3.1 Modulation Domain Identification	38
5.3.2 Phase offset estimation	39

5.3.3	<i>Modulation Scheme Estimation</i>	39
5.4	<i>Results and Discussion</i>	41
Chapter 6: Modulation classification through local density of constellation		45
6.1	Introduction	45
6.2	Signal and System Model	45
6.3	Modulation Domain Estimation	47
6.4	Modulation Order Estimation	48
6.4.1	<i>Phase Offset Estimation and Correction</i>	48
6.4.2	<i>Calculation of reference radius</i>	48
6.5	Results	50
6.5.1	<i>Proposed Classifier</i>	51
6.5.2	<i>Comparison to related work</i>	53
Chapter 7: Implementation of Modulation classifier over software defined radio		55
7.1	Introduction	55
7.2	LabVIEW FlexRIO Software Communication Architecture	55
7.3	FPGA elements used	56
7.3.1	<i>First In First Out (FIFO)</i>	56
7.3.2	<i>Memory elements</i>	57
7.3.3	<i>Flat Sequence</i>	57
7.3.4	<i>Single-Cycle Timed Loops (SCTL)</i>	57
7.4	Extraction of constellation points	59
7.5	Estimation of order of modulation	60
7.6	Modulation domain estimation	61
7.7	FPGA Implementation of the AMC Algorithm	61
7.8	LabVIEW FlexRIO architecture	62
7.8.1	<i>Hardware realization of AMC algorithm</i>	62
7.9	Results and discussions	65
7.9.1	<i>Experimental outcomes</i>	65
7.9.2	<i>Comparison with other classifiers</i>	68
Chapter 8: Conclusion and Future Scope		71
8.1	Parameter Estimation	71
8.2	Modulation Classification Algorithm	71
